

SWR METER

ProComm SWR meters are used for calibrating a CB antenna. Tuning your antenna is important because it allows you to get the best range possible with your antenna, and prevent damage to your CB radio.

TUNE YOUR ANTENNA

**Model Number:
PC-SWR3**

Specifications:

- Impedance: 52 ohms
- SWR: 1:1-1:3
- Accuracy: +-5%
- Frequency Range: 26-30MHz
- SO-239 UHF Type Connectors
- 100 Watts maximum power

Please note that installing this device in the antenna line requires an extra CB coax jumper to go from the device to your radio.
